we know the plastic business

SCS Plastics has created an identity in the Australasian market place as a quality packaging supplier to the primary produce, commercial and industrial sectors.

SCS Plastics provide services including development of design, tooling construction, material advice, sample testing, final product manufacture and delivery to customer.

SCS Plastics pride ourselves on attention to detail, with a keen focus on quality and environmental standards. We extend our technical knowledge to assist our clients in achieving innovative, functional disposable packaging. A service commitment highlights the SCS pledge to excellence and quality products within the packaging industry.

SCS standard products

SCS have a large range of in-house products that are functional and can be adapted to a wide variety of applications, limited only by your imagination.

These products are generally stock lines that can be delivered quickly and efficiently to your door.

Whilst we do endeavour to keep reasonable stocks of all products on site, it is appreciated if a seven (7) working day lead time is allowed. The most common of our generic products are listed in our catalogue, however, if there is something you can't find, please feel free to [contact](#) our office.

labelling

SCS, through discussion with a number of customers, has identified a need to add value to our services. As a result, the business has invested in a number of label application machines and have trained our staff to be focused on the presentation needs of your products. We have associations with a number of printing companies and would be happy to recommend a suitable printer to assist in the size, design and impact of your adhesive label needs.

special requests

SCS recognise that in today's competitive environment, it is necessary to make your products identifiable and unique.

Where possible, SCS are happy to work with you by packing your orders into custom printed boxes and adapting to your presentation needs.

innovation & design

SCS will assist in the construction and manufacture of your packaging from product conception to unit realisation.

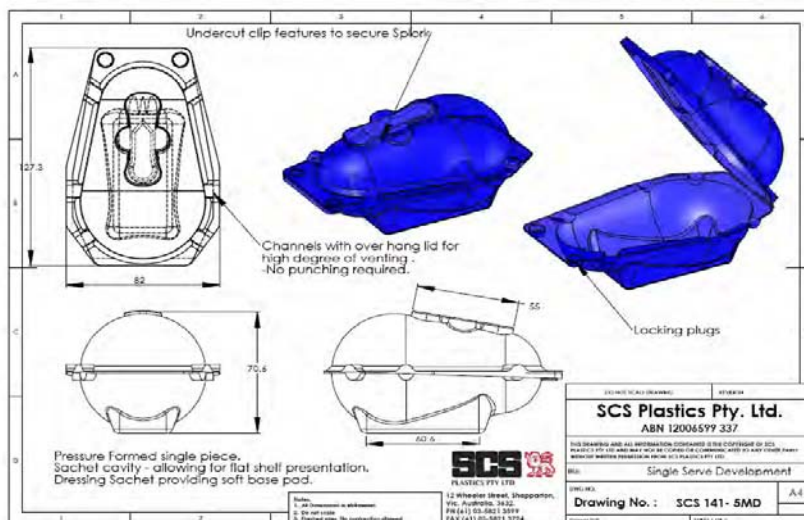

This process begins with a meeting with one of our staff to discuss the application, design limits, material options and lead times.

From this point, we are equipped to provide you with an estimate of unit and tooling costs.

The next step is to either provide drawings of the product or provide an "off pattern" sample.

Once approval of the sample has been obtained, we can then proceed to Production tooling.

Next, is unit production and delivery of product, to you, our customer.

SCS Plastics – your partners

In developing and designing packaging products to suit your specific and unique application

In value adding to your product. Whether it be the application of a self adhesive label or specialty treatment, SCS can help.

In warehousing and logistics. SCS can third party deliver your products anywhere in Australia.

who are we

SCS Plastics has created an identity in the Australasian market place as a quality packaging supplier to the primary produce, commercial and industrial sectors.

SCS Plastics provide services including development of design, tooling construction, material advice, sample testing, final product manufacture and delivery to customer.

SCS Plastics pride themselves on attention to detail, with a keen focus on quality and environmental standards. We extend our technical knowledge to assist our client achieving innovative, functional disposable packaging.

This commitment to service highlights the SCS pledge to excellence and quality products within the packaging industry.

SCS Plastics Pty Ltd was established in October 1985, by brothers, Chris and George Davkovski. Their aim was to present an operation specifically catered to the packaging needs of the region.

With the procurement of manufacturing equipment, SCS Plastics ' began producing items such as, fruit and vegetable trays, liners and punnets; meat and fish trays; dairy packs and some general purpose packaging items.

The company has seen substantial growth over the last two decades. In 1994 a new, larger factory was erected, to house the additional machinery purchased to meet increased customer demands.

This growth has compounded over the last five years. In 2001/2002 the company invested more funds into the further extension of the building and purchased further machinery. Every year the company invest money into new or upgrading of machinery.

Whilst the initial focus of the business was to provide disposable packaging to the primary produce sector, SCS Plastics has also diversified into other areas of packaging. The company is building strong relationships with commercial industries such as dairy; toys; confectionery; hardware; automotive; cosmetics and general packaging.

Expansion into a broader range of customers, with diverse packaging and handling needs, has forced SCS Plastics to review the processing and manufacturing procedures of the facility. As a consequence, SCS Plastics are now fully accredited to ISO 9001:2000 and HACCP standards. Additionally, SCS Plastics are signatories to the National Packaging Covenant, which we see as a vessel to address our environmental commitment to society.

The company is working with industry to provide aesthetically pleasing and environmentally friendly packaging products. We are pleased to provide our customers with detailed AUTO CAD drawings and functional prototypes supported with technical assistance throughout the development phase of any project.

As a consequence of the growth experienced by SCS, coupled with increased delivery demands by customers, the business has become a major employer of the region. The company operates three, eight hour shifts, five days per week. Additionally, SCS is still seasonally driven, which requires the increased operation of the facility to seven days per week for approximately four months of each year.

Time and funds have been invested to ensure the highest level of customer satisfaction, quality of product and the growth of the company. It is this commitment to excellence that ensures SCS Plastics continue to operate as a successful enterprise.

our new logo

the new face of SCS

In recent time, SCS Plastics has been undergoing a change in image and presence.

The Lion—representing “the Leader” has been our brand for more than 20 years. It’s updated presentation represents our commitment to re-newing our future, being a leader in innovation, continuous improvement of quality and on time delivery, every time!
